

Models & options

HOTGUARD is available in Slimline and Long Life size options and are available in Quad band GSM as well as low and high power VHF.

Made to last the units are shock, UV, splash and crush proof. A build-in "find me" function allow remote activation of the siren and beacon locator (optional). This is handy should the unit be hidden underground or lost in an area where GPS signal is unavailable.

It is often necessary to plot out routes and areas or to mark a location in high resolution. This function comes standard with all units.

Personnel safety

HOTGUARD is both a local & remote monitoring system for various application use such as: guarding, hiking, hunting, outdoor sports, research, surveying, VIP protection and even monitoring elderly and disabled persons.

Local monitoring: vigilance alert, stay awake alert, climate exposure, personal health and safety. A handy built-in plot function allows for easy high resolution plotting of areas, routes and points.

Remote monitoring: Virtual fencing, GPS location monitoring, behaviour exception monitoring, panic alert, extreme climate exposure and health.

"safeguarding tomorrow today"

HOTGUARD[®] - product information

Introduction:

Ever wondered whether your guards are patrolling and not sleeping? Ever worried about your safety when hiking? Ever wondered how people will know where you are when you need help?

Then HOTGUARD is for you. It intelligently reads your body language and tracks your position via GPS. It is rechargeable and available in both VHF and GSM options. Monitoring is via HOTEYE on the internet, email and SMS/MMS.

Features:

HOTGUARD units are remotely reconfigurable and available in two sizes: Slimline and Long Life. It securely fits to arm, waist, pocket, leg, belt or webbing kit. Comes standard with charger and adjustable belt and clip.

HOTGUARD seamlessly interfaces with almost any business type and personal application. Charge, activate and go!

HOTGUARD allows for easy user definable alert features such as: SMS, voice call, e-mail and on screen notifications. Responses are automated where the action of a single exception can automatically trigger the response of others.
